Waters of the State ☐ Residence/Occupied Structure ☐ Livestock ☐ Public Byway ☐ Surface Water Supply Area ☐

As defined in COGCC 100-Series Rules

Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

On 10/2 produced water was observed puddling around a 400 bbl produced water tank. It was determined that the water was leaking from the bolts around the man-way hatch into the tank. The bolts were tightened and the leaking stopped. Approximately 30 bbls of produced water were released inside the lined tank containment. A vacuum truck was called in on 10/2 and approximately 25 bbls were recovered. The truck was scheduled to return on 10/3 to recover the remaining liquid and remove the stones in the containment to allow the liner to be inspected.
