COMMENTS:

We are formally requesting that our remediation commitments associated with the project identified by Remediation Project # 9491 be put on hold due to an unstable landslide immediately up hill of the project area. Remediation commitments include the delineation of remaining subsurface impacts. This delineation would involve the utilization of an environmental drill rig which could potentially trigger the landslide or cause loose rocks/boulders to roll down onto the pad surface. After visiting the site on September 7, 2016, Carlos Lujan of the COGCC verbally approved this request.

H2S REPORTING

Data Fields in this section are intended to document Sample and Location Data associated with the collection of a Gas Sample that is submitted for Laboratory Analysis.

Gas Analysis Report must be attached.

H2S Concentration: _____ in ppm (parts per million) Date of Measurement or Sample Collection _____

Description of Sample Point:

Absolute Open Flow Potential _____ in CFPD (cubic feet per day)

Description of Release Potential and Duration (If flow is not open to the atmosphere, identify the duration in which the container or pipeline would likely be opened for servicing operations.):

Distance to nearest occupied residence, school, church, park, school bus stop, place of business, or other areas where the public could reasonably be expected to frequent: _____

Distance to nearest Federal, State, County, or municipal road or highway owned and principally maintained for public use: _____
