Clay,

This email is a follow up to our Field Visit 6/30/2016. Items that require a response from Antler are highlighted in Green.

Items that were discussed at meeting:

USA Clark-Millison #1, pit facility 116633:

- Current use of the pit
- Any discovery of Hydrocarbon in the pit must be removed within 24 hrs of discovery, rule 902.c.
- Treatment and removal of weeds around production equipment.

Land Treatment Area near USA Clark-Millison #1, Facility 446519:

- Antler should provide current BLM permit details; sundries, communication, current status, etc related to the facility.
- Facility 446519 was created to document the location of the Land Treatment Area.

Pit at Ptasynski 1x, Pit Facility 100408:

- Please prepare a Form 27 Remediation Workplan for pit Facility ID 100408.
- To assure that the this project moves forward, please provide a the Form 27 by August 1, 2016.
- Plan should outline; a brief history of pit closure activity, brief history of management of the waste and current status, please provide the latest analytical from both the waste and the pit (wall and bottom). Finally a plan for closure of pit and final disposition of land farmed waste (for beneficial use). Please include a start date and end date in the Plan.

This Email will be uploaded to the Facility numbers discussed in this email.

Attached is an example of a Form 27 to give you an idea of what we need to assure success.
