REFERENCE NUMBERS

COGCC Form 19 – Document Number 400913699

COGCC Form 27 – Remediation Project Number 9299

Pit is Facility Number 443630 (just created on 10/19/2015 for future referrals to this area)

Pit is Facility Number 116721 – ok to backfill larger pit

Good Morning Kris,

We are on the schedule of an excavator who will start work on backfilling the large pit and prepare excavation of the smaller pit for more testing. Estimated a week to 10 days. When we have more details, I will keep you updated.

I hope you have a great week!

Helen

Good Morning, Kris!

You are correct that the work has not been completed yet. I have phone calls in today with Mike Graf and Kris Rowe (HRL) to let us know when the work can be completed.

Thank you for the reminder and we will let you know the status as soon as we know. So sorry for the delay on this project.

I hope this email finds you well!

Helen

Helen and John,

Can you provide updates on the following 2 projects;

--the physical pit closure of pit 116721. This was the large pit at the Alta Martin location. Bayless provided demonstration that the pit soil concentrations were compliant with COGCC pit closure standards and bayless was notified on 12/1/2015 of approval.

-blowdown pit, facility 443630, a form 27 was submitted and approved on this location, remediation project 9299. what is status of closure? No report has been received by COGCC.
