General Comment:

This is an environmental inspection related to Remediation #9614 for the closure of a former skim pit (Fac ID #104731). Operator has submitted confirmation soil sample results. Based on those results, COGCC has approved final closure of pit. No indication of any oil stained soil left in the excavation. Clean fill material was stockpiled pending final backfill at the time of inspection. Please notify COGCC by email after the excavation is backfilled and provide site photo showing surface restoration. COGCC will close both the remediation project and the pit upon receipt of that information.
