Denver, CO 80203

**Re: Release of All Surface Reclamation and associated Surface Bond  
Synergy Resources Corporation, Synergy Disposal #15-18i  
API No. 05-123-25694, Location Facility 309984**

Dear Director Lepore:

NGL Water Solutions DJ LLC, Operator Number 10373, has purchased the surface formerly occupied by the Synergy Disposal #15-18i and does hereby assume all surface reclamation obligations. Synergy's well has been plugged and abandoned (Approved Form 6 Document #400883341) and NGL Water Solutions DJ, LLC has drilled a replacement well, the Apollo 11, API No. 05-123-42210, on the same property.

All surface reclamation will be handled by NGL Water Solutions DJ LLC when the Apollo 11 is abandoned, 20-30 years from now.

We hope that this letter and the Form 4 to which this is attached is sufficient for release of Synergy's surface bond.

Kind regards,

Neel L. Duncan, PE  
Vice President, Operations  
Agent for NGL Water Solutions DJ LLC
