Jan,

1) In the Facilities section you have indicated there will be a gas lift meter building on this proposed Oil & Gas Location. Because that is considered a production facility, Noble Energy needs to provide the distance from it to all of the Cultural features listed in the Cultural Setback Distance section of the 2A. Please provide me with these distances and I will add them to the Form 2A.

2) In the Water Resources section you have indicated the nearest water well is Permit #287427 approximately 2,926 feet from this proposed Oil & Gas Location and an estimated depth to groundwater of 110 feet. During my review I identified water well Permit #42977 located approximately 2,360 feet north with a static water level of 15 feet. As this water well is at a surface elevation that is 25 feet lower than this proposed Oil & Gas Location, I estimate the depth to groundwater at the proposed Oil & Gas Location to be approximately 40 feet. Therefore, I would like to revise the Water resources section to reflect this information.

Please respond to this correspondence by November 24, 2016. If you have any questions, please contact me. Thank you.
