Good morning Bob,

Yes, the Form 21 was filed on 11/02/2016.

The correct perms are 5,213-5,254. Sorry for all the differences.

Thanks,

Steven D. James, President
Western Operating Company

Steve,

Just got Kym Schure's field inspection report regarding the MIT of your Emerald 8-34. Let me know when you've filed the Form 21 for the MIT job so I can find it and approve.

In looking at the well I noticed that we have a Form 5A (Doc # 2209958) that is still unapproved. It was for a frac job in September 2014. In that Form 5A the J-Sand perms are listed as 5213-5250 ft. Is that correct? Previous MITs and our database show 5213-5226 ft. Nothing wrong with new numbers just want to check that they are correct. Approval of the 5A will update our Scout Card.

Cheers,

Robert P. (Bob) Koehler, PhD.
