#### COMMENTS:

Encana respectfully requests continued TA Status for the subject well.  
The well was TA'd due to sub-economic production. A CIBP was set at 4860' and topped with 2 sack of cement, which covers the Williams Fork perfs at 5265'-6686'. There is no tubing in this well and the master valve on the wellhead is closed to insure the well is closed to the atmosphere.  
Encana plans to review the economics and future development prior to the next MIT before 4/4/18.
