To: "Pesicka - DNR, Conor" <conor.pesicka@state.co.us>, Margaret Ash - DNR <margaret.ash@state.co.us>

Margaret/Conor,

Below are the COGCC required corrective actions (CAs) from the recent inspection. While one of the CAs has been completed the remaining two CAs will be completed after the assessment and remediation activities are completed on site. This will likely be passed the two required deadlines as we are still working to remediate the location. Both remaining CAs will be completed before the tank battery is returned to production.

### Wildfong 11-23 – 8/9/16 – Doc #679700213

- Need to remove stained soil in heater treater containment by 9/9/16. **Complete 8/22/16.**
- Increase containment berm height for produced water vault by 8/23/16 or prior to return to production. **To be complete prior to startup.**
- Need to increase berm height to maintain compliant containment volume around production tank by 9/9/16. **To be complete prior to startup.**

Thanks,

Brian
