Wagon Track 12-8 & 12-6 wells:	

FYI on 2 of Black Hill wells SW of DeBeque there were leaking tanks discovered this week but Ed Fancher (PET) and myself. Just letting you know. 12-8: T9S R98W Sect12 SENE, 12-6 T9S R98W Sect12 SENW.

Wagon Track 12-8 & 12-6 wells:

Hi,

I know that Chance is working on fixing the leaking tanks at these sites and Ed and I have not yet gotten to our paperwork for these but I wanted to touch base with you to be sure you know we need you to clean up those tank pits and test the walls to ensure all contamination is removed (COGCC Table 9-10), and provide the test results to us. We also want Black Hills to retrofit the secondary containment while this work is being done to our current standards. Please let me know if you have any questions.

Thanks,
