My Commission Expires 2/14/2019

**OIL AND GAS CONSERVATION COMMISSION OF THE STATE OF COLORADO**

**PUBLIC NOTICE OF PROPOSED UNDERGROUND INJECTION CONTROL PERMIT**

**PURPOSE OF PUBLIC NOTICE:**

The purpose of this notice is to solicit public comment on the BR-IW #1 injection permit submitted by Waste Management of Colorado Inc. The BR-IW #1 is a new vertical well being drilled expressly for commercial EPA-Class II disposal. The proposed surface drilling location is 2,486 feet from south line and 2,638 feet from west line of NESW of Section 28, Township 3 North, Range 64 West, 6th P.M., Weld County, Colorado.

**BACKGROUND**

Class II injection wells are permitted and regulated in such a manner as to prevent the contamination of underground sources of drinking water and to ensure fluid emplacement and confinement within the permitted injection zones. Class II injection wells are permitted to inject waste generated from oil and gas exploratory and production operations. Waste Management of Colorado Inc proposes to inject these fluids into the Lyons (8,814-8,726 ft), Wolfcamp (9,010-9,200 ft), Admire (9,200-9,300 ft), "Pennsylvanian" (9,300-9,600 ft; may include: Virgil, Missouri, Des Moines, Atoka Formations), and Fountain Formations (9,600-10,400 ft) in the BR-IW #1 through a cased-hole completion. Overall injection depths are planned from approximately 8,814 to 10,400 ft measured depth.

Public comments are encouraged and will be accepted, in writing at the Commission for a period of thirty (30) days after publication of this notice. If any data, information, or arguments submitted during the public comment period appear to raise substantial questions concerning proposed injection well permit, the Director may request that the Commission hold a hearing on the matter.

Additional information on the operation of the proposed injection well may be obtained at the Commission office.
