Comment

Topsoil shall be protected from degradation due to contamination, compaction and, to the extent practicable, from wind and water erosion during drilling and production operations. Best management practices to prevent weed establishment and to maintain soil microbial activity shall be implemented.

Current topsoil stockpiles have portions that either lack vegetative growth or an undesirable, weedy annual plant species has established on the stockpile (e.g., Russian thistle) which is not protective of soils to prevent weed establishment under Rule 1002.c.

Corrective Action

Stabilize topsoil stockpile with long-term, perennial vegetation.
