

Photo 1. View of the project area from the southwestern corner facing center. Revegetation is progressing with crested wheatgrass (*Agropyron cristatum*), smooth brome (*Bromus inermis*), and rubber rabbitbrush (*Chrysothamnus nauseosus*).

Photo 2. View of the southern portion of the project area from the southwestern corner facing eastward.

Photo 3. View of the western portion of the project area from the southwestern corner facing northward.

Photo 4. View of the eastern portion of the project area from the southeastern corner facing northward.

Photo 5. View of the northern portion of the project area from the northeastern corner facing westward.

Photo 6. View of approximately 100 Russian knapweed (*Acroptilon repens*) in the southwestern portion of the project area. It is not clear whether these were treated this year or if they are dormant. Project area will need to be carefully monitored for knapweed.
