FOR OGCC USE ONLY

SITE INVESTIGATION AND REMEDIATION WORKPLAN

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. Form 27 is intended to be used whenever possible. Additional documentation will be required when large volumes of soil and groundwater have been impacted or involve large facilities with multiple source areas. See Rule 910. Attach as many pages as needed to fully describe the proposed work.

CAUSE OF CONDITION BEING INVESTIGATED AND REMEDIATED

☒ Spill or Release ☐ Plug & Abandon ☐ Central Facility Closure ☐ Site/Facility Closure ☐ Other (describe): _____

OGCC Employee:

☐ Spill ☐ Complaint
☐ Inspection ☐ NOAV

Tracking No: _____

OGCC Operator Number: 16700Name of Operator: ChevronAddress: 100 Chevron RdCity: Rangely State: CO Zip: 81648

Contact Name and Telephone:

Michael HaubNo: 970-675-3814Fax: 970-675-3800API Number: 05-103-07274County: Rio BlancoFacility Name: Flowline from Fee 73XFacility Number: Flowline 73XWell Name: Fee 73XWell Number: 05-103-07274Location: (QtrQtr, Sec, Twp, Rng, Meridian): NWSW, 22, 2N, 102W, 6 Latitude: 40.124 Longitude: -108.837

TECHNICAL CONDITIONS

Type of Waste Causing Impact (crude oil, condensate, produced water, etc): crude oilSite Conditions: Is location within a sensitive area (according to Rule 901e)? ☐ Y ☒ N If yes, attach evaluation.Adjacent land use (cultivated, irrigated, dry land farming, industrial, residential, etc.): Non crop LandSoil type, if not previously identified on Form 2A or Federal Surface Use Plan: Silts and sandsPotential receptors (water wells within 1/4 mi, surface waters, etc.): No wells, no permanent surface waters

Description of Impact (if previously provided, refer to that form or document):

Impacted Media (check):

- ☒ Soils
☐ Vegetation
☐ Groundwater
☐ Surface Water

Extent of Impact:

Impacted soils were removed

How Determined:

visible oil staining follow by soil sampling

REMEDIALATION WORKPLAN

Describe initial action taken (if previously provided, refer to that form or document):

Provided in Form 19 Initial and supplemental.

Describe how source is to be removed:

Flowline was initially shut in at the well and the header, then repaired and tested.

Describe how remediation of existing impacts is to be accomplished, including removal and disposal at an injection well or licensed facility, land treatment on site, removal of impacted groundwater, insitu bioremediation, burning of oily vegetation, etc.:

No further remediation is proposed at this point as all samples taken from the spill path show organics well below the 500mg/kg threshold. All previously removed soils were taken to the Rangely land farm, and all formation containing liquids were taken to the main Rangely oil and water seperation plant.

REMEDIAL WORKPLAN (Cont.)

OGCC Operator No: _____
Received Date: _____
Well Name & No: _____
Facility Name & No: _____

OGCC Employee: _____

If groundwater has been impacted, describe proposed monitoring plan (# of wells or sample points, sampling schedule, analytical methods, etc.):

There is no impact to ground water as the depth to groundwater is greater than 5000 feet below ground surface. (6368 ft (DWR well 9119858)).

Describe reclamation plan. Discuss existing and new grade recontouring; method and testing of compaction alleviation; and reseeding program, including location of new seed, seed mix and noxious weed prevention. Attach diagram or drawing. Use additional sheet for description if required.

As stated in Form 19 oil was primarily contained in a man made siphon, which is devoid of vegetation and at a lower grade than the surroundings, thus no reconturing or reseeding of siphon is necessary. The remainder of the visibly contaminated soil along the spill path was cleaned by hand with a bucket and shovel having minimal impact to vegetation and grade, thus reseeding and regrading is unnecessary.

Attach samples and analytical results taken to verify remediation of impacts. Show locations of samples on an onsite schematic or drawing.

Is further site investigation required? ☐ Y ☒ N If yes, describe:

Samples show all organic levels meet Table 910 requirements. See attached report.

Final disposition of E&P waste (landtreated and disposed onsite, name of licensed disposal facility, recycling, reuse, etc.):

All E&P waste were taken to the Rangely field land farm for disposal as recorded in submitted Form 19

IMPLEMENTATION SCHEDULE

Date Site Investigation Began: 8/10/16	Date Site Investigation Completed: 8/11/16	Date Remediation Plan Submitted: 11/28/16
Remediation Start Date: 8/10/16	Anticipated Completion Date: 8/19/16	Actual Completion Date: 8/18/16

I hereby certify that the statements made in this form are, to the best of my knowledge, true, correct, and complete.
