**General Comment:**

P&A in process, day (2). Laid down 62 jts. TOO H w/92 jts. N.D.B.O.P. Pulled 1000 lbs. on casing, no movement, concerned with age of casing could cause undesirable depth of release.  
Notified COGCC Engineer (Dirk Sutphin) for approval to set stub plug @ 650'/perf and squeeze - add (10) sks cement for coverage. Plugging order change approved by Sutphin via telephone call with Schure. See procedure details (F4). Dumped (2) sks cement on CIBP - Cut casing @ 630' - laid down (40) joints - cut off surface head, freed up casing. Shut down for the day.  
FIR related to P&A procedure only - any/all corrective actions from previous FIR's, if not performed remain in effect.
