

Photo 1. View of the project area from the southeastern corner facing center.

Photo 2. View of the eastern portion of the project area from the southeastern corner facing northward.

Photo 3. View of the southern portion of the project area from the southeastern corner facing westward. Rills on the edge need to be monitored and stormwater controls installed if it worsens.

Photo 4. View of the western portion of the project area from the southwestern corner facing northward. Revegetation is comprised of grasses such as smooth brome (*Bromus inermis*) and western wheatgrass (*Pascopyrum smithii*).
