

Photo 1. View of Transect 1, within the project disturbance, from the end of the transect facing northward. Revegetation is largely comprised of blue grama (*Bouteloua gracilis*).

Photo 2. Birdseye view of vegetation at the midpoint along Transect 1, within the project disturbance.

Photo 3. View of the beginning of Transect 2, in the reference area facing southwestward. Vegetation in this area is dominated by smooth brome (*Bromus inermis*), western wheatgrass (*Pascopyrum smithii*), and Gambel's oak (*Quercus gambelii*).

Photo 4. Birdseye view of vegetation at the midpoint of Transect 2, within the reference area. This area is dominated with smooth brome with a significant cover of ponderosa pine (*Pinus ponderosa*) needles.

Photo 5. View of the eastern portion of the well pad facing southward.

Photo 6. View from the southwestern corner of the project area showing well established vegetation within the interim reclamation area facing center.
