RECLAMATION**INTERIM RECLAMATION**

☐ Interim Reclamation will commence approximately _____

Per Rule 1003.e.(3) operator shall submit Sundry Notice reporting interim reclamation is complete and site is ready for inspection when vegetation reaches 80% coverage.

☐ Interim reclamation complete, site ready for inspection.

Per Rule 1003.e(3) describe interim reclamation procedure in Comments below or provide as an attachment and attach required location photographs.

Field inspection will be conducted to document Rule 1003.e. compliance

FINAL RECLAMATION

☐ Final Reclamation will commence approximately _____

Per Rule 1004.c.(4) operator shall submit Sundry Notice reporting final reclamation is complete and site is ready for inspection when vegetation reaches 80% coverage.

☐ Final reclamation complete, site ready for inspection. Per Rule 1004.c(4) describe final reclamation procedure in Comments below or provide as an attachment.

Field inspection will be conducted to document Rule 1004.c. compliance

COMMENTS:

We are filing this Form 4 per instructions received on 8/2/2016, from Stuart M. Ellsworth, Engineering Manager, COGCC to apply to all wells previously approved for venting 4.22.2016. Williford is filing this Sundry Form 4 to get approval to continue venting the low volumes of associated casinghead natural gas from its wells (attached well map) in the Red Mesa Field. See attached for venting extension letter detail.

H2S REPORTING

Data Fields in this section are intended to document Sample and Location Data associated with the collection of a Gas Sample that is submitted for Laboratory Analysis.

Gas Analysis Report must be attached.

H2S Concentration: _____ in ppm (parts per million) Date of Measurement or Sample Collection _____

Description of Sample Point:

Absolute Open Flow Potential _____ in CFPD (cubic feet per day)

Description of Release Potential and Duration (If flow is not open to the atmosphere, identify the duration in which the container or pipeline would likely be opened for servicing operations.):

Distance to nearest occupied residence, school, church, park, school bus stop, place of business, or other areas where the public could reasonably be expected to frequent: _____

Distance to nearest Federal, State, County, or municipal road or highway owned and principally maintained for public use: _____

CONDITIONS OF APPROVAL, IF ANY:**COA Type****Description**

	<p>Williford will continue to evaluate and defined key points.</p> <p>1. Williford Resources, LLC will engage and discuss with the Southern Ute Indian Tribe (Tribe) regarding and United States Environmental Protection Agency (US EPA) any emission permitting requirements and obligations.</p> <p>a. Williford is coordinating with Mark Hutson, Southern Ute Indian Tribe (Tribe) regarding emissions within the exterior boundary of the Tribe's authority.</p> <p>b. Williford has the contact information for Claudia Smith, Region 8 US EPA and will be contacting US EPA for air permit requirements when a plan has been defined.</p> <p>2. Williford has contacted La Plate Electric about the set-up a compressor-generator package to use the natural gas to place electricity into the power grid for use to supply electric power to their field office and some field equipment. Williford through La Plate Electric is evaluating both 3-phase and single phase power generation. These options require at least 2-months after commitment to set-up. It is currently estimated that this would use about one-third of the vented natural gas.</p> <p>3. Williford Resources, LLC will evaluate the potential to permit and utilize a centralized enclosed combustion system.</p> <p>a. Williford has contacted a supplier about placing a flaring unit with 95 to 98% efficiency rating at a location owned by Williford resources. This unit is planned to flare the remaining two-third of the natural gas.</p> <p>It is understood that Williford has and will continue to work towards reducing and eliminating associated natural gas venting through the discussed options: pipelines, electric generation, enclosed combustion, and gas re-injection along with necessary emission permitting. With the current approval to vent ending December 5, 2016, it is anticipated that Williford will provide monthly updates.</p>
