Good Morning Doug!

It should only be 17 tanks. I apologize for not catching this. Attached is the correct facility layout.

Subject: [EXTERNAL] :COGCC Form 4 Sundry review for PDC Energy's Brown 5N65W23D location - Doc #401153387

Venessa,

While reviewing the referenced Sundry to add 1 oil tank and 1 separator, I noticed something curious. The Form 2A for this location indicates there were originally 16 oil tanks permitted for this Oil & Gas Location. If PDC Energy is adding one oil tank that would bring the total up to 17 oil tanks. However, the Facility Layout Drawing you have provided shows 21 oil tanks. Is this Drawing correct? I can find no Sundry record in our files for the four additional oil tanks shown on this drawing prior to this Sundry.

Please advise at your earliest convenience. Thank you.

Doug Andrews
