General Comment:

This is a followup inspection for inspection number 667100460 conducted on April 22, 2016. ConocoPhillips is implementing a plan and COAs to comply with the corrective action to reclaim the project area. Final reclamation was installed in November 2015. Per the reclamation plan and correspondence with COGCC, ConocoPhillips is monitoring weeds and stormwater on the location.

Comment: Canada thistle and musk thistle are present throughout the project area. These will require an aggressive weed control plan during the 2017 growing season.

Corrective Action: Control weeds at the appropriate time but no later than June 15, 2017. Weed infestation will likely require multiple methods/treatments to effectively control. Date **06/15/2017**

<p>Comment: Stormwater erosion is occurring on the slope and around the rock re-enforcement in the re-routed drainage in the northeastern portion of the well pad. See attached photos.</p> <p>Corrective Action: Monitor stormwater erosion during spring runoff and apply stormwater controls and additional reinforcement where needed and if erosion is worsening.</p> <p>Date: 05/01/2017</p>						
<p>Pits: <input checked="" type="checkbox"/> NO SURFACE INDICATION OF PIT</p>						

COGCC Comments

Comment	User	Date
Location does not meet reclamation and stormwater regulations. Weeds need to be controlled at the appropriate time but no later than June 15, 2017. Stormwater erosion needs to be monitored and controlled in the re-routed drainage and along the northeastern contour that slopes toward the drainage by May 1, 2017.	RoyC	12/08/2016
