Ryan:

You are approved as requested, however, I have added the Bradenhead COA to all of the requested extensions that did not have it. I think the only one that had a Bradenhead test requirement prior to plugging was the ERICKSON BIRKLE P 25-3 JI.

Steve,

I have couple more to request. Please approve extensions of the Form 6 expiration date until 11/30/2016 on these 6 P&As.

Below is a snapshot from our rig schedule and the driver behind the need. Most of them are in corn and the timing of the corn harvest can be unpredictable and drag all the way into late November. The timing of the harvest is driving the need for the extensions and the need for the requested extension date.

If you need any additional information, please let me know.

Thanks
Ryan

Ryan:

You are granted the extension until 10/15/16, however, I am adding an additional COA to the Intent as follows:

"Prior to initiation of plugging operations, a Bradenhead test shall be performed. If any pressure remains at the conclusion of the test or any liquids were present call COGCC Engineer for sampling requirements. Form 17 shall be submitted within 10 days."

Also, please be advised that we prefer to be notified of any potential plugging extensions prior to the Intent expiring.
Thank you, and have a great day.
Steve

Steve,

I would like to request an extension on the Approved Form 6 for this well through 10/15/2016. Our current plan is to start P&A work 9/13/16. Operations were delayed by internal group approvals, crops, and raptor stips. Please let me know if you need anything else.

Thanks
