Overall Interim Reclamation**Final Reclamation/ Abandoned Location:**

Date Final Reclamation Started: _____ Date Final Reclamation Completed: _____

Final Land Use: _____

Reminder: _____

Comment: _____

Well plugged Pass Pit mouse/rat holes, cellars backfilled Pass

Debris removed Pass No disturbance /Location never built _____

Access Roads Regraded _____ Contoured _____ Culverts removed _____

Gravel removed Pass

Location and associated production facilities reclaimed _____ Locations, facilities, roads, recontoured Pass

Compaction alleviation _____ Dust and erosion control _____

Non cropland: Revegetated 80% **Fail** Cropland: perennial forage _____

Weeds present _____ Subsidence Pass

1004.d. FINAL VEGETATION TRANSECT

TRANSECT RESULTS OF DISTURBED AREA% _____

TRANSECT RESULTS OF REFERENCE AREA% _____

TOTAL % OF DESIRABLE VEGETATION COVER _____

VEGETATIVE COVER _____

Comment: The location appears to have been mowed. There is an area of disturbance (tank battery site) off the county road which was mowed. There is predominately undesirable weed growth at the area off the county road and at the location. The fence is down at the northwest corner of the location. See Attached Photos

Corrective Action: _____ Date **04/01/2017**

Reseed the area of disturbance off the county road, access road, and at the location to facilitate desirable vegetation establishment. Repair the fence at the location.

Overall Final Reclamation

Fail

Well Release on Active Location ☐Multi-Well Location ☐**COGCC Comments**

Comment	User	Date
Establish vegetation with total perennial non-invasive plant cover of at least eighty (80) percent of pre-disturbance or reference area levels. Use a seed mixture that matches the adjacent pastureland or a seed mixture requested by the landowner. Continue to monitor and manage this site until Final Reclamation has Passed.	CostaR	12/14/2016
It is recommended that certified weed free mulch or an equivalent product be applied to the seeded areas to stabilize soils. The mulch will provide moisture retention and will benefit the success of the reseeding efforts.	CostaR	12/14/2016
Continued weed control (mowing) efforts should be performed to maintain the site and reduce undesirable weed growth.	CostaR	12/14/2016
