SPILL/RELEASE REPORT (SUPPLEMENTAL)

This form is to be submitted by the party responsible for the oil and gas spill or release. Refer to COGCC Rule 906.b. for reporting requirements of spills or releases of E&P Waste or produced fluids. Submit a Site Investigation and Remediation Workplan (Form 27) when requested by the Director.

Fluid(s) Spilled/Released (please answer Yes/No):

Was one (1) barrel or more spilled outside of berms or secondary containment? Yes

Secondary containment, **including walls & floor regardless of construction material**, must be sufficiently impervious to contain any discharge from primary containment until cleanup occurs.

Were Five (5) barrels or more spilled? Yes

Check if impacted or threatened by spill/Release (please answer Yes/No to all that apply):

Waters of the State  Residence/Occupied Structure  Livestock  Public Byway  Surface Water Supply Area

As defined in COGCC 100-Series Rules

Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

Internal corrosion on an injection line resulted in a release of approximately 89 bbls of produced water and no oil. Approximately 20 bbl of produced water was recovered. Additional information will be submitted on the supplemental report. The release is located approximately 10 feet east of the well (A.C. McLaughlin # 43). Fluids were removed with a vacuum truck and transported to the truck unloading facility at the Main Water Plant for recycling. Any impacted soil is transported to the Rangely Land Farm.

Additional Spill Details Not Provided Above:				
Originally, the volume of the spill was calculated at 89 bbls of produced water with 20 bbls recovered. The original volume was updated to 90 bbls released with 20 bbls recovered. The soil was water washed where produced water contacted the soil in the flow path. Based on previous experience, water washing the soil results in reducing the chloride content to concentrations less than the threshold listed in Table 910. Soil samples will be collected to demonstrate compliance with Table 910 when the weather permits. Notifications were expanded to include Rio Blanco County and the BLM in Meeker Co.				

## REQUEST FOR CLOSURE

Spill/Release Reports should be closed when impacts have been remediated or when further investigation and corrective actions will take place under an approved Form 27.

Basis for Closure:  Corrective Actions Completed (documentation attached)

Work proceeding under an approved Form 27

Form 27 Remediation Project No: \_\_\_\_\_

### OPERATOR COMMENTS:

Soil samples will be collected when the weather permits.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.
