Comment	User	Date
Continued weed control (mowing) efforts should be performed to maintain the site and reduce undesirable weed growth.	CostaR	12/14/2016
It is recommended that certified weed free mulch or an equivalent product be applied to the seeded areas to stabilize soils. The mulch will provide moisture retention and will benefit the success of the reseeding efforts.	CostaR	12/14/2016
Establish vegetation with total perennial non-invasive plant cover of at least eighty (80) percent of pre-disturbance or reference area levels. Use a seed mixture that matches the adjacent pastureland or a seed mixture requested by the landowner. Continue to monitor and manage this site until Final Reclamation has Passed.	CostaR	12/14/2016
