13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.

The A-19-7-104-S site has achieved success criteria for final reclamation. Encana is requesting Final Abandonment Notice approval. Note: Final inspection of location, with CRVFO BLM NRS, was completed on 11-01-16.

As requested, stormwater rills off pass-through access road have been rip-rapped. And, East portion of reclaim has been seeded with native Sage, hand-gathered, in general area. NRS report and photo documentation of corrective actions completed are attached.

14. I hereby certify that the foregoing is true and correct.
