Larissa,

The data that was uploaded on 12/19/2016 for the Hurd 51506 (Facility ID 753156) indicates that the Methane present in the well was greater than 1 mg/l and requires additional data under Rule 609.e.4. The rule requires that a sample be submitted for composition and isotopic analysis of the gas found in the water well.

The results of the gas analysis were not included on 12/19/2016, please provide them at your earliest convenience. Failure to collect and provide the data is a violation of Rule 609 and may lead to enforcement action. If you have any questions you may contact me.

Thanks,

Arthur

Good afternoon Arthur,

I am currently working with the Environmental team to gather the isotopic analysis for this well. I will have this to you as soon as possible and before the corrective action deadline date of 1/16/2017.

Thank you,

## Larissa Farrell
