

Photo 1. View of the project area from the southwestern corner facing center.

Photo 2. View of the western portion of the project area from the southwestern corner facing northward. Revegetation is sparse on cut-slopes and dominated by rubber rabbitbrush (*Chrysothamnus nauseosus*).

Photo 3. View of the southern portion of the project area from the southwestern corner facing eastward.

Photo 4. View of the southeastern portion of the project area from the southeastern corner facing westward.

Photo 5. View of musk thistle (*Carduus nutans*) growing within the southern portion of the project area.

Photo 6. View of musk thistles from the previous growing season growing within the southern portion of the project area. These will need to be controlled in 2017.
