1003 f. Weeds Noxious weeds? _____

Comment Inspection Doc. #682500600 documented that the location had recently been seeded and crimped. One growing season has passed, interim reclamation remains in process. Vegetation appears to be predominantly undesirable weedy plant species such as Kochia and Russian thistle, or annual triticum species, which do not contribute to the total % of desirable vegetative cover. Very little evidence of desirable perennial vegetative growth. Continue to monitor location, re-seeding may be needed if reclamation does not progress.
