

ENVIRONMENTAL RESPONSE FUND PROJECT SUMMARY

Project Name Little Hoot Gas Plant

Project Type (plugging, reclamation or environmental) Reclamation

Project Priority Low Priority

(High Priority – immediate threat to human health or the environment or related to a complaint. Moderate Priority – potential threat to human health or the environment within two years. Low Priority – potential long-term [greater than two years] threat to human health or the environment)

Project Status (planned [future project] or in process [bids requested]) In Process

Single Location (Y/N)? Yes Or Multiple Locations (list number of locations) _____

County Logan

COGCC Staff Contact John Axelson

Estimated Start Date (month/year) April 16, 2007

Estimated Duration (months) < 1 month

Bond Amount Available 0

Estimated ERF Cost Bid Pending, approx \$10,000

Estimated Special Appropriation Cost 0

Estimated Total Cost (sum of Bond + ERF + Special Appropriation) \$10,000

Problem Description (e.g., response to landowner complaint, discovered during routine inspection, etc. – also include problem to be resolved, such as leaking well, salt kill, stained soils, etc.) _____

Discovered during routine inspections. Former Gas Plant site operated as early as 1958. One surface structure remains at site as well as concrete blocks and pads, piping, anchor posts and one pit. No environmental impacts are evident.

Proposed Work _____

Work will include removal of all concrete, piping and anchor posts and on site burial pending landowner approval. The remaining building will be demolished and the resulting debris will be recycled, hauled offsite for appropriate disposal or, if properly permitted, burned on site as appropriate. All disturbed areas will be fine graded to match existing topography. Site will be revegetated to match existing conditions.
