Project Type (plugging, reclamation or environmental) Reclamation

Project Priority Low Priority
(High Priority – immediate threat to human health or the environment or related to a complaint. Moderate Priority – potential threat to human health or the environment within two years. Low Priority – potential long-term [greater than two years] threat to human health or the environment)

Project Status (planned [future project] or in process [bids requested]) In Process

Single Location (Y/N)? Yes Or Multiple Locations (list number of locations) _____

County Logan County

COGCC Staff Contact John Axelson

Estimated Start Date (month/year) April 16, 2007

Estimated Duration (months) < 1 month for site work

Bond Amount Available 0

Estimated ERF Cost Bid Pending Approx \$10,000

Estimated Special Appropriation Cost 0

Estimated Total Cost (sum of Bond + ERF + Special Appropriation) \$10,000

Problem Description (e.g., response to landowner complaint, discovered during routine inspection, etc. – also include problem to be resolved, such as leaking well, salt kill, stained soils, etc.) _____
Discovered during routine inspections. Former Gas Plant site operated as early as 1958. All surface structures have been removed. There are no environmental impacts evident. Several concrete blocks, pipes and anchor posts remain at the site.

Proposed Work _____
Work will include removal and proper sizing for off site disposal of remaining concrete, pipes and anchor posts. Land owner requested that nothing be buried on site. Debris will be transported to the solid waste landfill in Sterling, CO. All disturbed areas will be fine graded to match existing topography. Site will be revegetated to match existing conditions.
