**General Comment:**

This is an inspection conducted via desktop for a historical location that appears to have been plugged and abandoned sometime in 1930. There are no inspections on record for this location. There is no documentation on record that this well was plugged or that the bond was released. Therefore this location will need a final inspection to verify that the location is reclaimed and that the wellbore is no longer present. An aerial inspection of this location shows that the area has been developed and several houses are in the vicinity, no indication of oil and gas operations is observable.
