Taylor,

Moving forward, no CPW consultations can take place at any Welker property. CPW can still place a comment on the Form 2A.

If you have any questions, please do not hesitate to call me at (970) 309-2514 (cell), or email. Thanks.

Dave

Dave,

Thanks for that. I guess I had looked at the attached surface use agreement (item number 10) before I saw the letter. Please advise on which one is applicable?

Thanks,

Taylor,

Please see attached letter from the Welkers requesting that CPW not consult on their property dated 4-23-14, before this permit was submitted.

If you have any questions, please do not hesitate to call me at (970) 309-2514 (cell), or email. Thanks.

Heather,

Just emailing again for concurrence on the BMPs contained in the last email. I know we briefly discussed these at the onsite, but if Southwestern agrees with these specific BMPs please let me know and I'll get them entered.

Thanks,

Hi Heather,

Below are the recommended BMPs for the Welker 6-92 1-2H11 location. I believe we discussed all of these during the onsite, but if you could let me know if Southwestern is in concurrence it would be much appreciated.

Welker 6-92 1-2H11

Location: SESE, Section 2, T6N, R92W (Lat: 40.494361, Long: -107.680228)

Wildlife Concerns: This location is within Pronghorn Winter Concentration Area, Mule Deer Critical Winter Range, and Elk Winter Concentration Area Sensitive Wildlife Habitat (SWH).

Recommended Wildlife BMPs:

1. All construction and drilling activities within big game winter range will be conducted outside the period of December 1 to April 15.
2. Conduct post-development well site visitations to between the hours of 10:00 a.m. and 3:00 p.m. and reduce well site visitations between the period of December 1 to April 15 for big game winter range.
3. Establish company guidelines to reduce wildlife-vehicle collisions on roadways. Slow speeds and increased awareness among employees and contractors will help reduce impacts.
4. If water is obtained from nearby rivers or streams, screen suction hoses to exclude fish.
5. Do not, under any circumstance, return unused water back to rivers, streams, ponds or irrigation ditches. Properly dispose of water to eliminate the risk of spreading aquatic nuisance species.
6. Sanitize water suction hoses and water transport tanks using one of the following methods. Discard and rinse water at an appropriately permitted disposal facility.
  - a. *Remove all mud and debris from equipment and spray/soak equipment with a 1:15 solution of disinfection solution containing the following ingredients:*
    - i. *Dialkyl dimethyl ammonium chloride, 5-10% by weight;*
    - ii. *Alkyl dimethyl benzyl ammonium chloride, 5-10% by weight;*
    - iii. *Nonyl phenol ethoxylate, 5-10% by weight;*
    - iv. *Sodium sesquicarbonate, 1-5%;*
    - v. *Ethyl alcohol, 1-5%; and*
    - vi. *Tetrasodium ethylene diaminetetraacetate, 1-5%;*
    - vii. *and water, keeping the equipment moist for at least 10 minutes and managing rinsate as a solid waste in accordance with local, county, state, or federal regulations; or*
  - b. *Spray/soak equipment with water greater than 140 degrees Fahrenheit for at least 10 minutes.*

If there are any questions or needs for further discussion, feel free to give me a call.

Thanks,
