General Comment:

This is an inspection conducted via desktop for a historical location that was dry and abandoned in 1926 (Document 2438117). There are no electronic inspections on record for this location. Documentation does not clearly verify that the well was plugged. There is no documentation on record that this bond was released. Therefore this location will need a final inspection to verify that the well is actually dry and abandoned and that there is no well bore present. An aerial inspection of this location does not show any obvious disturbance related to oil and gas operations.
