Hi Larissa

We have completed the review of the above-referenced Form 2A and have identified the following inconsistencies. With your concurrence, the COGCC can make the following corrections.

- 1) The COGCC can change the distance to the nearest downwater surface water feature to 876 feet based on the Hydrology Map submitted by the Operator.
- 2) The COGCC can change the estimated depth to groundwater to 212 based on the static water level reported at DWR water well permit #51506.
- 3) The COGCC can change the Basis for Depth to Groundwater to reflect DWR Permit #51506.

Thank You
Melissa

Melissa,

These changes can be made.

Thank you!
