Ms Garrison and Ms Housey,

Attached is a revised Waste Management Plan for the EWS 4 well. Expedition has permitted a land application site on the property it owns in Section 18, T2N, R63W. the facility ID is 448951. Expedition requests that the cuttings and drilling fluids generated in the drilling of the EWS 4 well be allowed to be used as a beneficial soil amendment at this facility.

Please let me know if you have any questions. If it would make things simpler I can also submit this form by sundry.

Thank you,

Jeremiah
