Comment Interim reclamation of the location has not been conducted; Conoco Phillips currently has a 502.b variance request for this location "in process". Vegetation on the topsoil berm (and large portions of the current interim area) on the north end of the location is predominantly a cheat grass monoculture with very little perennial growth evident. If the 502.b variance to delay interim reclamation is granted, the topsoil berm will need to be seeded and stabilized with desirable perennial vegetative cover per reclamation requirements.
