Bill,

I'll add your update to our files. The tolling agreement has been received and the deadline to complete the MIT is June 30, 2017. A Form 21 submission is due within 30 days after completion of the MIT. Please don't hesitate to contact Andrew Stone or me with any additional questions.

Thanks,

Steven Mah

Steven- Update

You should have received our signed tolling agreement yesterday.

Form 5A does not apply.

Form 7- We attempted to e-file updated production data on this and other wells yesterday, but the system would not accept the API #, hard copies were mailed yesterday.

Form 4- We efiled a Form 4 to change status to TA

MIT- WE plan to do a MIT sometime in May or June 2017 (assuming our Tolling agreement gives us until June 30 ,2017.The well does not have a packer, so we will need to pull and rerun tubing adding a packer. we will submit form 42 within 10 days of the test.

If additional action is required, please notify us.

Thanks

Bill Claxton
