No objections to the changes. I'll make a note in the well file.

Thanks,

Diane McCoy

Diane,

I left you a voicemail about this well, quickly following it up with an email.

Due to the weather conditions, we do not have enough cement on location to pump our Niobrara balance plug. Instead of losing an entire day of rig time, we would like:

- Dump two sacks cement on top of the already set CIBP at 7870'
- Set another CIBP at 7150' (Niobrara top at 7147').
- Pump a 410' balance plug from 7150' – 6740' (35 sx / 54 cf).
- Continue uphole as designed.

This design adequately isolates the J Sand and Niobrara.

Please approve when able,

Thank you!

Elizabeth Hunt
