**General Comment:**

Engineering Integrity inspection conducted on 2/08/2017 with a primary focus on the identification of flowlines associated with this well. Details of observations made during this field inspection are available in the flowline section of this report. Please also note the comments located at the end of this report. Photo's uploaded can be accessed via link(s) at end of report.

Comment:	Wellsite flowline runs approximately 1200' south from wellhead to inlet at horizontal separator; Orientations of the well site, dump and gas sales flowlines observed. No flowline integrity issues were observed during this field inspection.	
Corrective Action:	Date:	

**COGCC Comments**

Comment	User	Date
Note: Future contact will be made with operator by COGCC Engineering Integrity staff regarding COGCC series 1100 (flowline) rules; with an emphasis on 1101e. annual flowline pressure testing requirements.	maclarej	02/17/2017
1101e. Pressure testing of flowlines. (1) Before operating a segment of flowline it shall be tested to maximum anticipated operating pressure. In conducting tests, each operator shall ensure that reasonable precautions are taken to protect its employees and the general public. The testing may be conducted using well head pressure sources and well bore fluids, including natural gas. Such pressure tests shall be repeated once each calendar year to maximum anticipated operating pressure, and operators shall maintain records of such testing for Commission inspection for at least three (3) years. (2) Flowline segments operating at less than fifteen (15) psig are excepted from pressure testing requirements.	maclarej	02/17/2017
