Jan,

Just a quick question concerning this 2A. I see where a total of 24 wells will produce to this location (8 wells on this location and 16 on the nearby J29-06 pad), but you have indicated there will be 78 separators. Is that number of separators correct? Three separators per well is unusual.

Please respond to this correspondence by March 21, 2016. If you have any questions, please contact me. Thanks.

Doug,

Noble is permitting the quantity of equipment due to a future plan of proposed wells that will produce to the J29-03 Production Facility. Noble categorizes additional separation equipment under "Separator" such as, Sand Separator's, High Pressure Separators, Liquid Surge Vessel's, Scrubber Vessel's, VRT's, etc.

Please let me know if you have any other questions.

Thanks

Jan
