**RE: COGCC Rule 317.s. Statewide Fracture Stimulation Setback
Highlands 5-64 15-16 Pad: NESE Section 15, Township 5 South, Range 64 West
Arapahoe County, Colorado**

Ladies and Gentlemen:

Highlands Natural Resources (Highlands) is applying to the Colorado Oil and Gas Conservation Commission (COGCC) to drill wells on the above referenced pad. COGCC Rule 317.s. stipulates that no portion of a proposed wellbore's treated interval shall be located within 150 feet from an existing (producing, shut-in, or temporarily abandoned) or permitted oil and gas wellbore's treated interval without the signed written consent from the operator of the encroached upon wellbore. As currently planned, the following well's treated interval is within 150 feet of the proposed horizontal's treated interval:

State B #1 Well, API No. 05-005-06660, approximately 83' offset from the Hagar 5-64 15-16-1BHZ

Pursuant to COGCC Rule 317.s., the signed written consent shall be attached to the Application for Permit to Drill (APD) Form 2 for the proposed wellbore. The distance between wellbores measurement shall be based upon the directional survey for drilled wellbore and the deviated drilling plan for permitted wellbore, or as otherwise reflected in the COGCC well records. The distance shall be measured from the perforation or mechanical isolation device.

Per COGCC Rule 317.s., Highlands is requesting operator's consent of the encroached upon setback for the existing well referenced above. Should you find this acceptable, please so indicate by executing the additional copy of the consent and returning to my attention in the self-addressed stamped envelope provided herein.
