Matt,

I have reviewed the referenced Form 2A Oil & Gas Location Assessment and have the following comments.

- 1) In the Location Identification section you have indicated this Oil & Gas Location was surveyed by Robert Kay on 12/10/10. However, the Location Drawing indicates it was re-surveyed by J.C., D.S. on 3/28/16 to add the three proposed oil and gas wells. Therefore, I would like to update the Form 2A to reflect this.
- 2) In the Construction section you have indicated the date planned to commence construction is 4/20/17 and the estimated date that interim reclamation will begin is 4/1/18. This is nearly a year and not in compliance with our Rules regarding interim reclamation (Rule 1003.b.). For Oil & Gas Locations on Rangeland we require interim reclamation to begin no later than six months after construction. Please provide me with a revised date that interim reclamation will begin that complies with Rule 1003.b. and I will update the Form 2A.
- 3) A review of your Location Drawing shows a 500 foot offset from the edge of the disturbance for the new wells. Since you are amending an existing Oil & Gas Location, the 500 foot offset needs to be from both the new and existing disturbance area. Please revise the Location Drawing to show a 500 foot offset from the combined disturbance area being sure to include the distance and direction to any additional visible surface improvements that may fall within this expanded offset.

Please respond to this correspondence by February 23, 2017. If you have any questions, please contact me. Thank you.

Matt,

While you have sent me a revised Location Drawing, will you respond to my request in Comment #1 and #2 from my original email. Thanks.

Hi Doug,

I'm sorry that I dropped the ball on this one. Below, please find my responses in blue text below.

Please let me know if you need anything else.

Thank you for all of you help!

Matt
