Hi Doug,

Please see Noble's responses below:

- 1) I forgot to include the following statement in the Other Disposal Description text box: "Drilling waste disposal information added to address non-oil based mud and fluids used in non-producing portion of wellbore."
- 2) Noble agrees to your request to remove the BMP's relating to Berm Construction, Tank Specification, and a portion of the Noise mitigation BMP.

Thank you.

Subject: EXTERNAL: COGCC Form 2A review of Noble Energy's A21-13 Pad location - Doc #401167795

Susan,

I have reviewed the referenced Form 2A Oil & Gas Location Assessment and have the following comments.

1) Because you have indicated that oil based muds will be used and that drilling fluids and cuttings will be disposed as an offsite commercial disposal facility, I would like clear the entries on the Drilling Waste Management section that indicates a Beneficial Reuse plan has been submitted as these fluids and cuttings will not be disposed of in this manner. Please let me know if that is acceptable.

2) You have included several Best Management Practices that pertain only to production facilities. They are the Berm Construction, Tank Specification, and a portion of the Noise mitigation BMPs. As no tanks and compressors are proposed for this well pad, I would like to remove those BMPs from this Form 2A. Please let me know if this is acceptable.

Please respond to this correspondence by March 23, 2017. If you have any questions, please contact me. Thank you.
