The customer must assume responsibility for water added at the job site. If you request the driver to add an excessive amount of water: (1) It will reduce the durability and strength of the concrete. (2) It will increase the cracking potential of the concrete.

In the event of delivery beyond curb line, or properties (off-road), this Company will not assume liability for damage to sidewalk, driveway, or other property. Delivery to job site must be accessible to our trucks under their own power.
