**General Comment:**

This is a follow up stormwater inspection in response to Form 42 Document #401217027 received on 2/22/2017 stating corrective actions from FIR Document #682501637 have been preformed. Any corrective actions from previous inspections that have not been addressed are still applicable.

Waddles	Pass					

Comment: [FIR Document #682501637](#) required to install or repair required BMPs along the northeast production area and interim area where gully erosion was forming. Corrective actions have been performed along the described area. It should be noted that portions of the wattle did not appear to be trenched or backfilled. Stormwater runoff might undermine the wattle and not properly function. BMPs should remain in place and in proper functioning condition until the location reaches final reclamation.

Corrective Action:

Date: \_\_\_\_\_

Pits: ☐ NO SURFACE INDICATION OF PIT
