To: Dave Peterson <davep@flatironenergy.com>, John Axelson - DNR <john.axelson@state.co.us>

Dave,

Based on the information presented, it appears that no further action is necessary at this time and the COGCC approves the closure request. However, should future conditions at the site indicate contaminant concentrations in soils exceeding COGCC standards or if ground water is found to be impacted, then further investigation and/or remediation activities may be required.

Please contact me if you have any questions.
