Operator
Comment:

This location was too muddy to get a truck into pump out the secondary containment or to remove the produced water. We shut the well in on 2-16-17 to prevent any fluids from being produced and, as noted in the field inspection form, the location was too muddy and property owners were complaining about bringing the mud onto

the highway.. We had planned to fix the breach in the berm when the weather is suitable. We plan to fix this berm by 4-30-17. The berms have been fixed on this location as of 3-14-17.
