Amanda,

Thanks for providing the Action Plan as well as the results of the confirmation samples.
Thanks to you and Thane for taking the time to meet on site last week. It was a great opportunity to share information and make sure that COGCC and the BLM are on the same page.

I passed/approved the supplemental e-form 19 Spill Report. The Form 19 (Spill Point #449436) is closed now. I included the following comments:

COGCC concurs with SG findings. No impact has been detected within or outside of the secondary containment. Therefore, no remediation is required regarding the release of water from the produced water tank.

The COGCC is nevertheless interested in the follow-up investigation of the secondary containment and it's upgrade. Please keep the COGCC informed via Sundry e-form 04.

Operator shall demonstrate that the secondary containment is compliant with Rule 605.a.(4). COGCC will conduct an environmental Site Inspection during the summer of 2017.

Thanks,
Carlos

Good morning Amanda,

Thank you for following up with me on this. I am grateful. I think everything is easy to understand and straight forward here. I am going to spend some time this afternoon working this into the MUE reporting I have to do to close this out. I will keep you informed of the need to submit this same information via a sundry in AFMSS. I am trying to determine if I can attach the reports instead. So stay tuned and hopefully you can help of it becomes necessary to submit otherwise.

I appreciate the opportunity to meet in the field with Carlos and SG to get this taken care of. Thanks again for the detailed report and plans.

Have a good morning.

Hi Thane,

Attached is the Form 19 requesting closure, submitted this afternoon. The Action Plan and Lab results are attachments to the Form 19, also included in the attached. I will also send to Gunnison County.

Thanks!

Amanda
