Erin,

I have reviewed the referenced Form 2A Oil & Gas Location Assessment and have the following comments.

- 1) Thank you for providing the additional information confirming that SRC Energy is the current Surface Owner. This is important to have been made clear as the nearest Building Unit is on the parcel owned by SRC Energy.
- 2) In the Cultural Setback Distance section you have indicated the nearest Designated Outside Activity Area (DOAA) is 3,554 feet from a well and 2,756 feet from a production facility. I am unaware of any DOAAs that have recently been recognized by the COGCC in the Greeley area. To my knowledge there are only two, both located in Longmont. Please conform the distance to the nearest DOAA.
- 3) During my review it appears the area where the production facilities will be located overlies two additional NRCS Soil Map Units. They are the 39-Nunn loam, 0 to 1% slopes and the 3-Aquolls & Aquents, gravelly substratum. Please provide me with the NRCS Soil Description for these two soil units and I will add them to the Form 2A.
- 4) Your Traffic Control 604.c.(2)S - Access Roads BMP indicates "*Dust control measures will also be utilized.*" Please revise this statement to specify what dust control measures will be utilized.
- 5) Your Noise Mitigation 604.c.(2)A BMP indicates sound walls will be used on the north and west side of the location. As the nearest Building Unit is immediately east of the location, why does the resident living there not get noise mitigation? Regardless of the fact that SRC Energy is the Building Unit owner, if someone is living there during construction and drilling operations, they will be impacted by noise.
- 6) Now that the Public Comment period has passed, please provide me with a letter certifying compliance with Rule 306.e. If any meetings/consultations took place, please also include the outcome.

Please respond to this correspondence by April 21, 2017. If you have any questions, please contact me. Thank you.

Doug

We will confirm the DOAA with plat company. I am 90% positive the BU that we own we are using it strictly as an office, but I heard we might be tearing it down to rebuild a nicer office. I will follow up though w our surface land man.

Attached are the two NRCS map units, it was hard to tell if production facilities made it in that soil survey area. I will get you everything else later this week (maybe by tomorrow) for this pad related to your questions below. We are still waiting for Noble to sign the waivers for the Form 2's, so hopefully we get them today.

I requested Penny to check the box "is committed to an oil and gas lease" for this pad as well. Sent that email earlier this morning. ☺

1. You are so welcome.
2. Thank you for catching this distance. It should be 5280. Attached new plats to correct that distance for the DOAA.
3. I sent the NRCS map units earlier this week.
4. Traffic control: Mag Chloride will be used on access roads. I will add this to future 2A BMP's so you have this information.
5. Noise Mitigation: The building unit is unoccupied and will remain that way through operations. Synergy has no plans to utilize this as a residence or an office.
6. Attached 306.e. letter

I sent an email to Penny if she could check the box that synergy is committing to an Oil and gas lease that would be great ☺
